

Mysite Testing

This document defines the procedures and processes used to do the testing.

Testing will be done:

1. Unit testing
2. Integration Testing
3. System Testing

It will first be done in a localhost mode and then a real server mode.

1. localhost Mode

This is the Visual Studio Code (VSC) environment. It will be done locally on my laptop.

2. DigitalOcean Mode

This is where a real server environment will be installed and configured to perform the final Testing

3. This will be a Phased
