

WHS Class of 1969 – 1 Year Contact List Report – August 8, 2018

The purpose of this report is to determine where we are relative to our 274 Classmates and where we need to go from here.

1. Classmate Status

162 – Confirmed - I have validated (with them) their mailing address and probably have their phone #, and email address.

41 – Deceased – If I found information about their death, I put it in their Reference Document. If there was an online obituary, I also included a link to it. More than half of these Classmates have no information about their death. We really need to find more information about their death.

11 – Lost – These are Classmates that I have no mailing address for. I primarily use TruePeopleSearch.com to locate Classmates. All but 2 are women and they are probably married and I don't know their married name.

60 – Not Confirmed – These are Classmates that I have a mailing address for, but not been able to get any response from them. In most cases I have tried the following to contact them:

1. Send a letter with a self-addresses/stamped return envelope.
2. Left phone message on their answering machine.
3. Sent them a Facebook message if on Facebook. 8 in this group

For some of these, I am 100% sure that their mailing address is correct, and their phone# (I left a message on) is correct. 23 are from the hometown area.

2. Contact List Spreadsheet

I am using a Microsoft Excel Spreadsheet to keep all of the contact information for each of our Classmates. The primary columns are:

- Their Name (Last/Maiden, Married, First, Middle, Nickname)
- Email
- Phone – Mobile and/or Landline
- Birthday
- Facebook Page – This is the URL of their Facebook Page.
- Status (C-Confirmed, D-Deceased, L-Lost, #-Not confirmed).

- Note. The Note column is where I keep detailed notes of my attempts to contact them, as well as other information.

All Classmates have been told that their contact information will be kept private and not given out to anyone. To date, I have just given this spreadsheet to Sharon (Richardson) Elliot to keep as a backup, if mine gets lost, or I vanish from this earth.

One purpose of this spreadsheet is to be able to produce a mailing list so labels can be printed to affix to envelopes for our Reunion mailings.

3. Google Contact List

I keep a Google Contact List kept on my laptop and iPhone using my gmail account. Someone would have to know by Google 2 level password or iPhone passcode to access it. I keep it for ease of access of Classmate Contact information. It makes it easy to email or Text a classmate.

4. Google Earth

Only on my laptop using Google Earth, do I keep the mailing address of our classmates with their senior face attached to their location. I can see geographically where our Classmates are located. On our website, I have a menu (Google Earth) that shows Google Earth snapshots of different parts of the country with Classmates names. It does not show enough details to make out street names.

5. Reference Document

This is the document that is connected to each Classmate picture (senior picture & current picture) under the Classmate menu. About half of the 160 Confirmed have provided me with their information. That means that about 80 have not. I have many outstanding emails asking for this information. I understand that many of them just don't want that information posted on our website.

6. Website

I only had a few Classmates indicate that they had trouble using this site. I know that it is very difficult to use on a small smart phone. I have a small iPhone, and I can get it to work, but have to use a stylus or zoom in on some screens. I use a

Laptop, iPad Air, and iPhone 5s, but have no idea how this website looks/works on the many other types of devices. I need to get some feedback and will post something in our Facebook Group for feedback.

7. Facebook Group

“Wintersville Warriors Class of 1969” is the Facebook Group with the Event (50th Reunion). There are 108 Members in this group. Of that there are 5 that are going (including me), and 10 that are Interested. Most posting to this group is seen by 88 Members.

8. 50th Reunion

“Where do we go from here?”

A Reunion Committee needs to be assembled.
